

I am stating my firm objection to ALL of these proposed changes.

1) It is obscene and disgustingly cynical to propose that driving rather than FLYING is more efficient in 2021.

2) As most city dwellers know there is literally NO public private partnership that has made the service better for the PUBLIC (see Chi parking meters and CTA fare svcs outsourced to Ventra). This is also another transparent attempt to break the USPS union which is the largest public sector union and majority minority. The USPS has been the most effective path to increasing income equality for African Americans.

3) Closure of post offices, specifically in rural and low incomes areas. This is super important because the USPS provides sooooo much more than mail, one such important service is wiring money.

****slowing mail and reducing mail carriers is not just about the annoyance of getting your birthday cards two weeks late. Mail carriers are wellness-checkers on the elderly. MANY people have been saved because their mail carrier noticed a change in the routine.

Efficient delivery of mail is CONSTITUTIONALLY protected. The PEOPLE's representatives should not be proposing legislation that makes the lives of Americans qualitatively worse. If you talk to any constituent I guarantee that you will find that (even in improved covid times) mail is already the slowest and most inconsistent it has ever been.
